I never thought I'd feel so alone without you
I never thought I'd want someone so much, I need you
What am I gonna do?

I want you, I need you, I long to be beside you
I want you, to see you, I want you, I want you

Never have the lights seemed so cold around me
And never have the streets been so empty, surround
me
What am I gonna do?

I want you, I need you, I long to be beside you
I want you, to see you, I want you, I want you

Oh, oh, oh, what am I gonna do?

I want you, I need you, I long to be beside you
I want you, to see you, I want you, I want you
