#### Verse 1

So cold smile like it's sunny  
Side up but you always runny  
Scrambled brain with an empty tummy  
This high life it looks so yummy  
Honey, they like your dress  
They like your heals they like your chest  
Everybody knows you rock it the best  
You got that look you got finesse  
And less, is never more  
You want more cause less means poor  
You don't wanna have to do your chores  
The Filipino lady she can clean all the floors  
What's in stores not what's in store  
Tryna be hard but you got no core  
For your conscience you should note  
You never looked so cold in your fucking fur coat

#### Chorus

Wade in the water  
Wade in the water children  
Wade in the path that you face  
God's going to trouble x2

#### Verse 2

You saw god soaring above  
He was wearing a suit looking all smug  
On the brightest cloud with the loudest wings  
Even up in heaven they value things  
Bring your grit shoot your shit  
Kneel at the gates and chat yo chit  
Maybe they'll bit your bit  
You was always so good at putting on the Ritz  
What you willing to do?  
With a tuxedo mask you can sail to the moon  
A hand full of hearts and a heart full of spades  
Dye your hair but baby it fades  
Wade in the water child

Up to your knees in jewels and smiles  
In the tide hide your tracks  
And when it goes out  
Don't look back

Chorus X2

Bridge

See that girl all dressed in red  
Seems like we never met  
See that girl all dressed in blue  
She don't know what she running too  
See that girl all dressed in white  
Somebody got to show her the light  
See that girl all dressed in black  
Somebody's got to bring her back

Chorus X3

If you get there before I do  
Gods going to trouble the water  
Tell my friends I'm going to get there soon  
Gods going to trouble the water
