(Larry Cordle)

Don't stop gypsy  
Don't you give up your ways and settle down you're still  
young  
There's still a lot of life that hasn't been seen  
Take the world as it comes and get your rest in  
between  
Chance will never come around again.

Goodtime highway  
With the wind in your hair as you're ridin' to wherever  
you please  
You can take your guitar and play your songs to the  
stars  
While they twinkle above your head  
And who cares what tomorrow brings.

Don't you tangle with romance cause it'll leave you  
alone  
And crying in the end  
The life that you lead must be simple and free  
It's not your fault my friend  
Don't stop gypsy.

--- Instrumental ---

Don't stop gypsy  
Don't you give up your ways and settle down you're still  
young  
There's still a lot of life that hasn't been seen  
Take the world as it comes and get your rest in  
between  
Chance will never come around again...
