Get down baby, Funky

I said get get get on down get on down

Funky, I said get get get on down get on down

Never though the memories would cause us so much pain

When night time falls it brings the good times back again

With you and I, i can't deny the love that remains

We touch each other, in a special kind of way

The bittersweet parade we got will never end

So baby let's not pretend

That destiny has played it's hand

Chorus:

Can't stop the tide from flowing,

Can't hold back the pain

Can't fight the feeling,

It's like nothing stops the rain

Baby there's no denying

You've got what I crave

Got the hunger

It's like nothing stops the rain

We're trapped together, it's just something we can't explain

I'm your essential baby, you're my necessity

So let's agree that we do things in a different way

Opposites attract that's the way we'll always be

The bittersweet parade we got will never end

So baby let's not pretend

That destiny has played it's hand

Chorus

Wanna get down tonight

Oh y'gonna get down tonight

Wanna get down tonight

Oh y'gonna get down tonight

Nothing stops the rain

Nothing stops the rain

Chorus till end.
