"Fading away"

Visit "[Fading away](#)" on MotoLyrics.com

When I've opened my plastic eyelids I've stored you
Virus of restricted emotion rapidly filled my nano brain
I'm not able to rectify the error in a the program, failed to erase your image.
Segments of code forms your face again (your face again)

Kill me now, stop the synthetic heart
No, I can't do it by myself
Time is running out and disappearing for us
So it's the time to fade away

My own feelings are just a side-effect of the test
Why it becomes so painful to realize that you're just a tool?
Life procreated me and now it dumps me as a waste,
It Kills my self-rendered nature, my cyber love violates their rules (their foolish rules)

Kill me now, stop the synthetic heart
No, I can't do it by myself
Time is running out and disappearing for us
So it's the time to fade away

For my love there is are no asylums left
But I'm a leving human being
There's no place for my synthetic fate
And I want to scream

For my love there is are no asylums left
But I'm a leving human being
There's no place for my synthetic fate
And I want to scream

Kill me now, stop the synthetic heart
No, I can't do it by myself
Time is running out and disappearing for us
So it's the time to fade away
