"Slow Down"

Visit "[Slow Down](#)" on MotoLyrics.com

Slow down
Take your time
It will be all right
If you decide to take it on the science
Take it easy
Take it easy

Slow down
Take your time
It will be all right
If you decide to take it on the science
Take it easy
Take it easy

Oh slow down

And now I understand
Why facing a friend
Is so hard, sometimes
But guess what
You're not the only one
The door is shot
But so is your mind

Slow down
Take your time
It will be all right
If you decide to take it on the science
Take it easy
Take it easy

Slow down
Take your time
It will be all right
If you decide to take it on the science
Take it easy

Take it easy

Oh slow down

But then we explain you

You'll have to complain

But kept the bright side

Open your eyes

Along with your mind

It's not so bad

God is love and love is all around

You do the best you can

As it have to be great

Open your arms

Now is the time

To get away with your life

Hold on

And your heart and enjoy the ride

Slow down

Take your time

It will be all right

If you decide to take it on the science

Take it easy

Take it easy

Slow down

Take your time

It will be all right

If you decide to take it on the science

Take it easy

Take it easy

Oh slow down
