I slowly shoot these words like weapons  
And go insane  
I watch you drive your stupid car  
You go away  
You were never one to use caution  
It slipped away  
You know I'd love to see it happen

Chorus:

Happy Death day to you baby  
I know you're flying in the blue now  
We'll be together real soon now baby, don't you worry  
Papa's got a brand new body bag for you

Cable cars run through my mind  
Reminiscent Bay  
I always tried to keep you near me  
Without the pain  
I love to tie us into knots  
We slipped away  
I tried to captivate you, on that evening  
He was leaving, with the girl I'd like to kill

Chorus

And I got a fresh new kind of attitude

I slowly shoot these words like weapons  
And go insane  
I watch you drive your stupid car  
You go away  
You were never one to use caution  
It slipped away  
You know I'd love to see it happen  
Chorus

And he ain't ever ever coming back to you
