"Let It Out"

Visit "[Let It Out](#)" on MotoLyrics.com

When life is lonely
And you feel down
There's always someone
to help you out

You're deeply thinking
And you feel so down
So wait for sunlight
To guide you out

Why can't you leave that sadness behind
There's some sweetness you may find
Waiting for some sunlight to warm your bones
Waiting for some darkness to take you home

Let it out, let it out, let your freedom shout
And celebrate reality
Get it on everybody and sing it loud
There's happiness to be
Let it out, let it out, let your freedom shout
And celebrate reality
Take a hand everybody and show you're be proud
There's happiness to be

You feel like crying
For all your time
You feel like trying To realise

Just give emotion
And spread your wings
Just think it over
There's simple things

When twisted emotions take you back to the start
Show there's sweetness in your heart
And prove all the ones that couldn't see
There's always happiness to be
