Our hearts have lovely painted
themselves across the ocean
I know it's safe to try this
Our new love resolution

You know how safe we can be
Sometimes you wonder if I'm happy
Baby I'm glad to know that I'm your hero
Little angel, I'll show you what I'm made of
I'll cut through these thorns to prove my love
Drag out the monsters built in your darkest nightmares

Drop down your makeup
Stop looking in your fucking mirror
I got so sick and tired of you trying to look better
We look so beautiful when we're both naked
We make the perfect team to spend our days wasted

Our hearts have lovely painted
themselves across the ocean
I know it's safe to try this
Our new love resolution

I'll Glue you by my side
Make sure you scream tonight
Blood pressure rises high
As I hold you tight

Drop down your makeup
Stop looking in your fucking mirror
I got so sick and tired of you trying to look better
We look so beautiful when were both naked
We make the perfect team to spend our days wasted

I'll get tattooed (tattooed) your name across my chest
for us
for us to remember our love is a kind of pain to get
used to
