It's been a month of rain and cold
All we can see around is grey and old
Same same songs messing with my ears
We've gotta take a break to be released

While sitting in the bus, heading back home
We're feeling so blue since the sun is gone
When suddenly a ray, a huge big hole
Into the dark roof of Big Apple
Into the dark roof of Big Apple
Into the dark roof of Big Apple
Into the dark roof of Big Apple

Come on get up and take a deep breath
The sun is finally back
Go on move up shake shake your thang
And do your crappy dance
Come on get up and take a deep breath
The sun is finally back
Go on move up shake shake your thang
And do your crappy dance

Spring is full of dreams and hope
Trees are green and the flowers are gold
Girls are blooming and the sky is bright
We gotta wave and kiss the clouds goodbye

Love is screaming around in the town
Life is a bliss when the sun is up
Suddenly a ray, a huge big hole
Into the dark roof of Big Apple
Into the dark roof of Big Apple
Into the dark roof of Big Apple

Come on get up and take a deep breath
The sun is finally back
Go on move up shake shake your thang
And do your crappy dance
Come on get up and take a deep breath
The sun is finally back
Go on move up shake shake your thang

And do your crappy dance

Love is screaming around in the town
Life is a bliss when the sun is up
Suddenly a ray, a huge big hole
Into the dark roof of Big Apple
Into the dark roof of Big Apple
Into the dark roof of Big Apple

Come on get up and take a deep breath
The sun is finally back
Go on move up shake shake your thang
And do your crappy dance
Come on get up and take a deep breath
The sun is finally back
Go on move up shake shake your thang
And do your crappy dance
