Holding you makes me forget the things that I'm
supposed to do
Get up and go to work but I always knew
I should've stayed while I was holding you

Getting tired but just one word from you and I feel
inspired
Open me up to all of life's grand desires
I should've stayed while I was being admired

Holding you is all I'm thinking about
Holding you, don't feel like going out
Holding you, I think I'll just stay here with you a little
while
A little while

Leaving you makes me appreciate the things you say
and do
Get up with me so early I always knew
I should've stayed while I was holding you

From goodbye, all day I'm gone the time is just
crawling by
Can't wait to hold you close, and let feelings fly
I'll always stay while you are by my side

Feel you pull me low
You know I've got to go
But I don't really need to know
What I'd be missing if I didn't show
Gotta leave you now
If I could find out how to go without this feeling baby
Hold me now just one more time today
So I stay

Holding you makes me forget the things that I'm
supposed to do
Get up and go to work but I always knew
I should've stayed while I was holding you
