"Go"

Visit "[Go](#)" on MotoLyrics.com

Someone told me to forget you
but how could forget someone that made me, made
me love and made me smile
ever since I saw you - you have been the only one I love
you're the only one i want

And I wont go - go away
I will be for you forever - i will always be around
And we will stay - stay together
We will always be together - we will always be the same
And we never wanna change

Now I want to show my inside - everything's for real
now can you feel it
Can you feel the things behind you
Living dreams and many options - that is what our lives
should be about
You're the only one I want

And I wont go - go away
I will be for you forever - i will always be around
And we will stay - stay together
We will always be together - we will always be the same
And we never wanna change

And I wont go - go away
I will be for you forever - i will always be around
And we will stay - stay together
We will always be together - we will always be the same
And we never wanna change
Never gonna change
No we never gonna change any more
