Everywhere I go it seems a little unfamiliar to me  
And everything I hear it seems a little off-key  
It's like I'm running without shoes on my feet  
I have a fever even when I'm standing in the breeze  
You have me feeling a little strange  
No this cannot be explained  
There must be a chemical imbalance in my brain  
Or else, I'm in love.  
I think I hear your voice when no one's calling my name  
I get lost walking in circles, I think I'm insane  
You have me feeling a little strange  
No this cannot be explained  
There must be a chemical imbalance in my brain  
Or else, I'm in love.  
You have me feeling a little strange  
No this cannot be explained  
There must be a chemical imbalance in my brain  
Or else, I'm in love  
Oh I'm in love, oh I'm in love.  
You have me feeling a little strange  
No this cannot be explained  
There must be a chemical imbalance in my brain  
Or else, I'm in love.
