Turn the lights down
You can turn the lights down low
I could tell you sit by my side
Fuck at the time
You can see my feelings grow
I could be the one you want
The one you need
Regardless of the way I see
No, we can go slow
Go slow (x2)
Baby

Take you by the hand
Walk you through the door
I just wanna lay you down
Not gonahit you with a love song
Not gonna hit you with a love song, no

And in the morning I'll be long gone
Out of the door before the sun comes out
Not gonna hit you with a love song
Not gonna hit you with a love song, no

You know you look so pretty
I know the chance is so hard
Wanna take you with me right now
Somewhere it's dark
I know the fire is burning
And you caught those feelings
Running up and down your spine
I don't wanna waste time
Waste time (x2)
Baby

Take you by the hand

Walk you through the door
I just wanna lay you down
Not gonna hit you with a love song
Not gonna hit you with a love song, no

And in the morning I'll be long gone
Out of the door before the sun comes out
Not gonna hit you with a love song
Not gonna hit you a love song, no

Love song
Take me by the hand
Take me by the hand
Walk you through the door
I just wanna lay you down
Take you by the hand
I just wanna lay you down

Take you by the hand
Walk you through the door
I just wanna lay you down
Not gonna hit you with a love song
Not gonna hit you with a love song, no

And in the morning I'll be long gone
Out of the door before the sun comes out
Not gonna hit you with a love song
Not gonna hit you a love song, no

Not gonna hit you a love song, no (x4)
