Time's Goin'™

You're walking through the grass,
And looking at the sky
The trees they cast, the shadows in my eyes.
Sun still shines and time's goin'™ x2

The breeze on the leaves, it talks to me
Nature's™ lullaby, and sings me to sleep
Sun still shines and time's goin'™ x2

Its on its way, on its way,
I need it now, need it now
Its almost here, almost here today

And listen to the sounds as quiet as they seem,
and taken by the thought of losing everything
Sun still shines and time's goin'™ x2

Its on its way, on its way,
I need it now, need it now
Its almost here, almost here today

Its on its way, on its way,
I need it now, need it now
And its almost here, almost here today
