can you hear the preacher calling

for you to get on your knees and pray

for all our friends that are falling

i hope i'll see you again

what can i do to bring back to you
all that was taken and all that was shook
i hope that you'd wake up and it all was just a dream
i still hear them saying can you rescue me

no one seems to know the reason
makes you question what you believe in
i wish that i could chase it all away
last night i saw it in your eyes
i knew you were in pain but i'm so far away

what can i do to bring back to you
all that was taken and all that was shook
i hope that you'd wake up and it all was just a dream
i still hear them saying can you rescue me

oh rescue me
(speech)

what can i do to bring back to you
all that was taken and all that was shook
i hope that you'd wake up and it all was just a ream
i still hear them saying can you rescue me
