"My Little Earthquake"

Visit "[My Little Earthquake](#)" on MotoLyrics.com

Meet me at the top of the world tonight
So we can watch it fall
Like we don't care at all

You're just what I need, a natural disaster
I want you to move me
I want you to break me

You're my little earthquake
Oh, you make the earth shake
And even when I can't be reached
Oh, you break your way to me
My little earthquake
My little earthquake
Oh, you take the pain away
And even when I can't be reached
Oh, you break your way to me
My little earthquake

Tell me all your secrets, while the world divides
This is the last call, so let's feel it all
Stronger than fiction, love is hard to fake
Take my hand and show me all the things I can't see

Chorus

If the ground gives way beneath our feet, will the
Distress set us free?
I hear the sound I need, your voice completes. Wants to
Finish inside of me.

Chorus
