Too long have I been hiding  
Running scared from the ghost you became  
Giving in to the hatred inside me  
Ending your life will be my fucking game

So here we stand, face to face  
Now I'm the fear that's inside you  
Ripping you from the inside out  
I'll fucking tear you up just to break you down

So come and get me,  
I'll be waiting right fucking here  
So come and get me

I will, turn your, blood into poison  
I will, cease your, heart from beating  
I will, never, stop till you start  
To bleed from your eyes  
And are fucking choking on your heart

I have become the murder  
Sent to destroy the destroyer  
This is never ending vengeance  
I will rip you from this world

My torment has come to this  
Heaven's tears fall from blackened skies  
Forever, I'll be here, waiting  
To fight a ghost, that never dies

I will never die!

So come and get me  
I'll be waiting right fucking here
