"Fight for your love, fight for your love"  
(repeat twice)

Lights in your eyes, (it's) time for the laser beams on  
There are the stars shinin', there are the people  
praying  
On this planet earth  
Face to face, it is the key to the kingdom  
It isn't hard to find it by the people on the streets

You might be getting a little afraid of being loved  
Don't cry now, there should be a chance for real life  
It's the time, to stand up, for your feel, for your love  
Take your chance and hope, more and more...

(Chorus)  
Dreams and love, shake your body and soul, eternally  
You were born here, YES, exotic Japan  
Dreams and love, shake your body and soul, eternally  
We were born here, SO, exotic, exotic Japan

Burning love, suddenly it finds you and comes to you  
There are people loving, there are people living  
All over the world  
Hold me now, I can make you fly and feel the love  
It is sad without it, try to have some fun

You used to cry all night, searching for love  
Tears never stopped, it looked like the end of the world  
Look at the sky, sail the sea, to the world, of your love  
Love and hope, more and more...

Chorus
