She Whispers in my ear  
Can I get you a cold beer  
While all that wildlife is covered with oil  
Strumming my six string  
Trying not to sing  
About those shrimp, beginning to spoil

Here we go again destroying our mother earth  
Hunting down her last buffalo  
Some people claim that it's Big Oil to blame  
But I know, it takes two to tango

Well, I know the reason  
I go there in season  
It's not to watch an oil well blow  
But the gulf is a beauty  
So let's do our duty  
How it got there, I'll never know

Here we go again destroying our mother earth  
Hunting down her last buffalo  
Some people claim it's politicians to blame  
But I know, it takes two to tango  
I slipped on a tar ball  
On the beach after nightfall  
So I got on a plane and flew on back home  
But there's fuel in my big truck  
Cause just like you, I suck  
We love our petroleum, it helps us move on

Here we go again destroying our mother earth  
Hunting down her last buffalo  
Some people claim that there's somebody to blame  
But I know, it's our own damn fault.
