"War"

Visit "[War](#)" on MotoLyrics.com

The darkened sky I feel their eyes
Watching over me
The smell of fear It's always near
Never lets go of me

Reaching inside I can try
To make it go away
Locked in my cage Silence fades
It's on it's way

War - It's damage done
War - Spares no one
Spreads like a disease
War - You're not safe
War - You're in it's way
This thing that should not be

I see the hate Accept my fate
Standing in front of me
With every step It's closer yet
A million miles away from me

War - It's damage done
War - Spares no one
Spreads like a disease
War - You're not safe
War - You're in it's way
This thing that should not be
