"In The Backseat"

Visit "[In The Backseat](#)" on MotoLyrics.com

I've been a lot to the movies lately
The last one ruined my heart
I saw the world go down and under,
Everything just fell apart

But in the backseat,
In the backseat of the car
What a place to think things through
In the backseat,
You can find out who you are,
And decide what you should do

When a horrible night is over,
And I've got dirt on my hands
I'm so sick of the lies,
The losers and everyone playing in band

But in the backseat,
In the backseat of the car
What a place to think things through
In the backseat,
You can find out who you are,
And decide what you should do

Oooh, oh, oh, oh, oooooooh
Oooh, oh, oh, oh

Been alone for a long, long time now
I've been sleeping all day
I've been sitting on my bed
Alone without anything good to say

But in the backseat,
In the backseat of the car
What a place to think things through
In the backseat,
You can find out who you are,
And decide what you should do
