If you don't know me by now 2X

When you came along  
It happened over nite  
Everything in my life  
Came into your light  
So perfect, so right

I know nothing stays the same  
& everything must change  
now you're trying to explain  
Baby, No more games

If you don't know me by now  
Then you never will  
What am i to do to get through to you  
To you

What am i to do  
To get through to you (2X)

I never (never 7X)  
I never, thought i could feel this way  
or question what it takes  
How many times can one heart break  
So much pleasure, so much pain

If you don't know me by now  
Then you never will  
What am i to do to get through to you  
To you

What am i to do  
To get through to you

If you don't know me by now  
By now (2X)

I've done all i can do  
Now the rest is up to you (you 4X)  
I've done all i can do

Don't look back

I've done all i can do  
Now the rest is up to you  
Will you be the man for me  
Take the time to just come clean  
when it all became a past  
Do your best to make it last  
Wake up & don't look back

Don't look back

If you don't know me by now  
Then you never will  
What am i to do to get through to you  
To you

What am i to do  
To get through to you

If you don't know me by now  
Then you never will  
What am i to do to get through to you  
To you

What am i to do  
To get through to you

To get through to you (3X)
