(Hook)

Girl, just take them clothes off,
I love your body show it all.
Uh, just wear that birthday suit,
We're gonna have a party, me and you.

Let's have a party, girl, let's have a party,
Girl, let's have a party, party.
Girl, let's have a party, girl, let's have a party,
Girl, let's have a party, party.

(Verse)

I woke up to her, I say Shawty, what you do?
My name is Jonh, I must admit I'm choosing you.
Your friends are bad, but you're the baddest in the
room
You got me thirsty and I'm trying to sip on you.

Just leave them in there, baby,
Till the countdown, let's go crazy,
Girl, just hop in my coop,
No one, but just us two.
And when I poke you're gonna love a nigger stroking
Imma leave that thing on something,
Let your body roller coast.

(Verse)

Hello, baby, you know you drive me hella crazy
Sitting, meditating, we're steady sipping that
medicating.

Let's have a party, having fun ain't no better way to.
You know I ball hard, but I will never play you
Find a way to get it popping, no sitting and watching,
I thought you figure bout a Marley, you feeling
nostalgic.
Playing attack and then you stop and start play some
marvin
And after that I feed your body, I'm the one who's
starving.
Plus you know it's not a party unless some people show,
Find Victoria's secret, she never speaking on.
She should be seeing, I'm needing some of your loving
And greed because you love it, I'm leaving it to this
flood
And chilling with homies, get it wet till it's flooding
Got that keys wet bumping who can does it how I does
it.
Look, nobody, lody-doddy, baby, let's have a party
maybe.
