"A Star Falls from Heaven"

Visit "[A Star Falls from Heaven](#)" on MotoLyrics.com

When the moon is softly beaming
and the world beneath are dreaming
the stars comes down from heaven to earth

Every star has got the beauty
to deliver love and beauty
and feather only places where they may

A star falls from heaven one beautiful night
brings to me a glimpse of delight from the skies above

A star falls from heaven and shows me the way
how to be content and gay, for it brings me love

2x

It whispers to me that you're wonderful, beautiful, heavenly
and that you're mine, dear

A star falls from heaven and soon makes me see
that you have been waiting for me how I thank my star
