When we talked about the future  
to wonder what would be  
did we preach  
upon the world  
not to deny democracy  
well the truth is now fruition  
and  
the leaders of their world  
say we should drop the ammunition  
to create a  
brighter day for  
everybody searching their souls to find  
everybody living  
for the times  
so we witness revolution  
see them raze the berlin wall  
tear down the institution that  
takes freedom from us all  
on the road to  
resolution  
world now hear the call  
to live a life of liberty  
and justice  
after all for everybody
