(Verse 1)

I'm yelling baby don't go  
Got me trippin and wishin  
For things to go back to before  
But I can't now I'm livin in regret  
Thinkin back at all the times I'd give disrespect(damn)  
Never thought that you would leave  
Gave me so many chances and I took em for granted  
Damn it (uh) and I just can't handle it  
So now you packin ain't havin no more excuses  
Tellin me I'm so abusive to your heart and left you with  
bruises (wah)  
How could I do this? When I loved you more than  
anything  
I guess I was too selfish and never did anything (damn)

(Hook)

She said it hurts  
She said that she don't deserve this  
And if it carries on well then  
She's up, up and gone  
She said she's been here before  
Trapped in the threats that he swore  
She's broke down mistreated too long  
And now she's up, up and gone

Gone, Gone x2  
Up, up and gone  
Gone, gone x2  
Up, up and gone

(Verse 2)

Sittin here thinkin what I did wrong  
Maybe I didn't listen didn't pay you much attention  
Maybe I was too stressed  
And took out the person that cared more for me  
And I cared less for her  
But that ain't true, she stayed on my mind  
I knew she been through a lot, and this time  
It'd be different so was I the same?  
Did I add to her history of her heart to such lames?

Addin to her pain made her happy then crushed her  
heart  
Put my hands to her face and be so vain?  
She gave her broken hear to me  
Hopin I'd mend the weak  
She told me what made her hurt  
And what made her cry  
That if I did the same it would mean goodbye  
Now it's goodbye?

(Pre Hook)

She tries to walk away from what they were once  
Holding on tight to the thoughts that leave her unsure  
She's lookin back and she begins to let go  
He had his chance now she needs to let him know

(Hook)

She said it hurts  
She said that she don't deserve this  
And if it carries on well then  
She's up, up and gone  
She said she's been here before  
Trapped in the threats that he swore  
She's broke down mistreated too long  
And now she's up, up and gone

Gone, Gone x2  
Up, up and gone  
Gone, gone x2  
Up, up and gone
