Again, keep me, but I'm clenching already, why  
bruises on my hands I mean for love  
still do not sleep with me, but penetrate only why  
and tears on my face mean to love  
them back to you to shake you everything you  
something now.

As they began first by right and attack, then left  
as you vkaram lyabovta of his will opomnish know  
where you are.  
As they began first by right and attack, then left  
they can push with my body, I would turn away any  
time.

Looking at me again, but I do not love his eyes,  
Butterflies in my stomach will return you tell  
miss you again, but not see you hurt,  
phones overheating will return you tell  
them back to you to shake you everything you  
something now.

As they began first by right and attack, then the left,  
as you vkaram lyabovta of his will opomnish know  
where you are.  
As they began first by right and attack, then left  
they can push with my body, I'll turn away Do you then. /
