cross my heart, hope to die
i swear i won't say what happened that night
so starting today things are gonna be all right
your best you tried, and yeah you did fine
no better than fine, perfect in my mind
in fact, i wish your heart was mine
and i can hear the memory in my ears
back to the years and all those tears
but hear me when i say im glad we steered that way
because now we're here

do you want to get away? get in the car we can leave
today
do you want to celebrate our just made little holiday?
cus now today is your day
all that stuff you used to take
im glad you threw all that away cus now you look so
great
you never need to be afraid just know yuo went the
right way

because even though we never get things right
and it gets so old just saying we'll keep trying
its mine to decide when ill be alright

i know you're going crazy (crazy)
but happy is all that you make me (all you make me)
and now things are gonna get better baby
i know everything went wrong OK (OK)
but now its time to get some better days (some better
days)
cus i don't want to keep acting this way

cus man i know we never get things right
and it gets so old just saying we'll keep trying
but its mine to decide when and if ill be alright..
and thats just a thing that take time

so keep going till you know when its time, when its right
keep showing yourself in that light
cus back in school man that gets cruel

but one thing is true is that man now look at you
your heart is big enough for two

because i can hear the memories in my ears
back to the years and all those tears
but hear me when i say im glad because we're here

i know you're going crazy (crazy)
but happy is all that you make me (you make me)
and now things are gonna get better baby
i know everything went wrong OK (OK)
but now its time to get some better days (better days)
cus i don't want to keep acting this way

cus man i know we never get things right
and it gets so old just saying we'll keep trying
but its mine to decide when and if ill be alright..
and thats just a thing that take time
