I have waited for this day  
To feel I'm fitting in  
And I have longed to feel this way  
To be alive again

I came back, back, back to life  
I came back, back, back to life  
I came back

I made plans to go away  
And never to return  
I did not think I'd feel this way  
But this is what I've learned

I came back, back, back to life  
I came back, back, back to life  
I came back

And now there's time to think  
Of someone else besides myself  
And now there's time to think  
Of someone else

I came back, I came back  
I came back, back, back to life  
I came back, back, back to life

I came back, back, back to life  
I came back, back, back to life  
I came back, I came back

I came back, back  
I came back, I came back  
I came back, I came back

I came back, back, back to life  
I came back, back, back to life
