Just to switch on the Spring
The texture is a wet asphalt
Set Sky by five megabytes
And give a little more of wind (so wild)
Put my power into rain
But my megahertz're not enough
To make a smell of the rain
I'm robot and I don't, I don't have a heart

Not permitted to break on the roofs just like young spring rain
Not permitted to spill by the puddles this cold and grey day
Not permitted to flow down like streams upon green spring grass
To be rain
I can only dream of this
I'm robot, and I don't, I don't have a heart

A thousand points of stars,
I wasn't there dot r.u.
I should not bring to them
Morning smell of grass, it's true
Put my power into light
But my megahertz're not enough
To set a planets alight
I'm robot and I don't, I don't have a heart

Not permitted to break on the roofs just like young spring rain
Not permitted to spill by the puddles this cold and grey day
Not permitted to flow down like streams upon green spring grass
To be rain
I can only dream of this
I'm robot, and I don't, I don't have a heart
