Partying; where to begin?
I don't care aslong as I'm dancing
I watch you, moving

Don't turn away, just face me...
Coz I don't want you feeling lonely
You want me
You need me
And I know

I know you're looking for love
You can't deny it
Coz it's written all over your face
I know you're looking for love
Don't try to fight it
If you're lost I'll show you the way

Just follow me
Follow me
I've got everything that you need

Just follow me
Follow me
I'll take you right where you wanna be

I know you're looking for love
You can't deny it
Coz it's written all over your face
I know you're looking for love
Don't try and fight it
If you're lost I'll show you the way

Just follow me
Follow me
I've got everything that you need

Just follow me
Follow me
I'll take you right where you wanna be

Let's get this straight

It's getting late
I want you to come back to my place

You seemed so shy
Now you're sky high

Out of the club, hand in hand
I think you know what I've planned
I got you, You've got me
Kiss me

I know you're looking for love
You can't deny it
Coz it's written all over your face
I know you're looking for love
Don't try and fight it
If you're lost I'll show you the way

Just follow me
Follow me
I've got everything that you need
Just follow me
Follow me
I'll take you right where you wanna be

I know you're looking for love
You can't deny it
Coz it's written all over your face
I know you're looking for love
Don't try and fight it
If you're lost I'll show you the way

Just follow me
Follow me
I've got everything that you need
Just follow me
Follow me
I'll take you right where you wanna be
