"Featuring You"

Visit "[Featuring You](#)" on MotoLyrics.com

My heart had a bunch of beats
And none of them seemed to work for me
I can't find the point to sing
When everything seems so out of key
I was looking for a melody
You walked right in and took the lead
I didn't know what to say
Cause everything sound so differently

Now my heart goes boom, boom, boom
It's like a million notes a minute
And I don't know how you did it
Yeah my heart goes boom, boom, boom
So let's put our song on replay

You and me together make a number one record
Girl you know the only song that I wanna do
Is featuring you
You can be the lyrics, it's like I already hear it
Girl you know the only song that I wanna do,
Is featuring you

Now you're stuck inside my head
Like the hit on the radio I can't forget
Now my life's got a new soundtrack
When I sing it for you, you sing right back
No solo, we duet, and I'm never going back to the way it was
And I know that we just met
But it all sounds better with the two of us

Now my heart goes boom, boom, boom
It's like a million notes a minute
And I don't know how you did it
Now my heart goes boom, boom, boom
So let's put our song on replay

You and me together make a number one record
Girl you know the only song that I wanna do
Is featuring you
You can be the lyrics, it's like I already hear it
Girl you know the only song that I wanna do,
Is featuring you
Is featuring you

Hey baby, you're my number one feature
I have to write a song about you, everytime I see you
I can be the melody, you could, could be the lyrics
Make em wanna throw they hands everytime they hear it cause

You and me together make a number one record
Girl you know the only song that I wanna do
Is featuring you
You can be the lyrics, it's like I already hear it
Girl you know the only song that I wanna do,
Is featuring you
Is featuring you
Is featuring you.
