I'm gonna start at the beginning
I'm gonna make something out of nothing
No I don't know anything about Beethoven
But I know that you will always haunt me

You have been brought here
For something so much greater than me
But it's hard cause I'll get all of the attention
When you're work is so much more important
Please don't stop looking at me
Don't walk out on me

I should be singin'
To earn my keep by now
I guess my throat just can't carry the weight
Listen now you can hear the sound of how
It's been blown out

Oh A and C
I know your just an old standby
But you'll help me tonight to get across all I mean
Listen now, please don't walk out on me
