Times are tough and times are strange  
But time's one thing that you can't change  
Love is a noun and love is a verb  
But sometimes love is a dirty word

It don't matter what tomorrow brings  
Tonight you just need to think about one thing  
And that's showing up and letting go  
And maybe gettin' just a little out of control

And sing ohh  
Don't you just wanna rock 'n' roll  
Gather up a couple of friends  
Let a shot hit the spot  
And the party begin  
And sing ohhh yeah  
Don't you just wanna rock 'n' roll  
Lose yourself out in the crowd  
In the night, in the lights  
Cuttin' loose some love  
Drown all the stressed up  
Theft up messed up out  
That's all I'm talking about

The sun will shine  
And the clouds will rain  
Might have to learn to smile through the pain  
You lose a step but you gain a friend  
Might even catch a break every now and then  
So don't sweat it just let it slide  
And when you get on the road baby let it ride  
You gotta get up to get down  
You gotta unwind a little to come on 'round

And sing ohh yeah  
Don't you just wanna rock 'n' roll  
Gather up a couple of friends  
Let a shot hit the spot  
And the party begin  
Ohhh yeah  
Don't you just wanna rock 'n' roll  
Lose yourself out in the crowd

In the night, in the lights  
Cuttin' loose some love  
Drown all the messed up  
Theft up stressed up out  
That's all I'm talking about

And when you get tired of trying to be  
Who they want you to be  
Be what you wanna be  
Well come on, come on

Ohhh oh yeah  
Don't you just wanna rock 'n' roll  
Gather up a couple of friends  
Let a shot hit the spot  
And let the party begin  
Ohhh oh  
Don't you just wanna rock 'n' roll  
Lose yourself out in the crowd  
In the night, in the lights  
Cuttin' loose some love  
Drown all the stressed up  
Messed up theft up out  
That's all I'm talking about

Don't you just wanna rock 'n' roll [x2]  
Gather up a couple of friends  
Let the party begin  
Lose yourself out in the crowd  
Don't you just wanna rock 'n' roll
