I was 12 years old when I learned to masterbate
I was peekin through my brothers door staring at his
date
She wasn't fine but I didn't care and I barely had any
pubic hair
Long as she moved hell that's ok with me

When your 12 years old your dick will grow whenever
the wind starts to blow
It's hard to explain but the feelings great
Lord I love to masterbate
Just grab ahold and don't let go
You can do it fast or you can do it slow
When you get through hell do it again
You might even want to show your friends....how to
masterbate
