THE BEST YEARS OF OUR LIVES
WRITER RODNEY CROWELL

When I was young and restless I wasted so much time
Halfway stoned and halfway out of my mind
Well I don't feel that much different though now I
realize
These are the best years of our lives
These are the best years that we're living in
And I know that someday later we're gonna reach the
end
Though time stacks up against us the fire inside still
thrives
These are the best years of our lives
These are the best years that we're living through
Then I know that someday later you're gonna know that
too
There's so much more to living now than the kind of car
we drive
These are the best years of our live these are the best
years of our live
