Waiting for decisions,
Believers in a word cause you are the leader.
I'm losing you and my sky's turning grey
And I hope a prayer would keep us together
It's my turn to let tears stealing down on my cheeks
And cryin til the pain is over
I can't keep standing now
And I let it burn out out out this fire

And your hand leads me to heaven
I didn't know I could survive
There's no need to be frightened
Eternity just got our own,
I miss our free ways,
I miss our past days,
I miss our free ways,
The days just pass away.

A rebirth cause I want to show you that revealing lets me
do things better

Deep in your eyes I wish I could feel your heartbeat
Cause my heart keeps beating faster
Like the sunshine on my skin I'd like to
Feel your lips let you run in my veins forever
And you're here by my side
And I could sing until you promise me to stay

And your hand leads me to heaven
I didn't know I could survive
There's no need to be frightened
Eternity just got our own,
I miss our free ways,
I miss our past days,
I miss our free ways,
The days just pass away

Drive this road
Take me away tonight
Let's watch both our
Photographs
Even if the rain drowns our memories
Goodbye
If you don't mind

And your hand leads me to heaven
I didn't know I could survive
There's no need to be frightened
Eternity just got our own,
I miss our free ways,
I miss our past days,
I miss our free ways,
The days just pass away

Waiting for decisions, believers in a word cause you are the leader.
I'm losing you and my sky's turning grey
And I hope a prayer would keep us together
