Been atop the New York skyline
Sailed across the ocean blue
Been alone on a desert island
And I've been a guru too

Don't you write her off like that
Don't you write her off like that
Don't you write her off like that
She's a real fine lady, don't you see

Don't you write her off like that - don't you write her off
Don't you write her off like that - don't you write her off
Don't you write her off like that - don't you write her off
She's a real fine lady, don't you see

I met the girls in every city
Every town that I've passed thru
You won't find one half as pretty
Or one with a heart so true

Don't you write her off like that - don't you write her off
Don't you write her off like that - don't you write her off
Don't you write her off like that - don't you write her off
She's a real fine lady, don't you see

Don't you write her off like that - don't you write her off
Don't you write her off like that - don't you write her off
Don't you write her off like that - don't you write her off
She's a real fine lady, don't you see

If you leave her now, he'll get her
Then I know you'll change your mind
You won't find one better
Can't you see that love is blind

Don't you write her off like that - don't you write her off
Don't you write her off like that - don't you write her off
Don't you write her off like that - don't you write her off
She's a real fine lady, don't you see
