Roger McGuinn
"Got Two Again"

Now this song employ the use of numbers
What I'll do is have a volunteer give me a number
And I'll take that number and make a verse for a song
out of it
Now if someone will give a number between twenty and
twenty two
I'll show you what I mean (twenty one) it's very good
first time twenty one
Well twenty one take away nine twelve little children
standin' in the line
From that take two that leaves you ten take away eight
you got two again
Yeah you got two again you got two again
You used to love me once and now you got two again
You got two again you got two again
You used to love me once and now you got two again

I see how easy it was the second verse
And if someone to give me a number between twelve
and fourteen
I'll make the verse (thirteen) thirteen huh thirteen
Well thirteen multiply by one you still got thirteen but
wadn't that fun
Now take the same thirteen multiply by two twenty six
hours the train's overdue
Yeah you got two again you got two again...

10 9 8 7 6 5 4 3 2 happy people devided by one leave
nothing nothing none
Yeah you got two again you got two again...
You used to love me once and now you got two again
You used to love me once and now you got two again
