

Rogue Wave "Right With You"

Visit "[Right With You](#)" on [MotoLyrics.com](#)

Light the force that's on my back and get right with
you*
Light the force that's on my back and get right with you
I push down to win you
Because it isn't too important
Light the force that's on my back and get right with you
Hold my head down again, bring back some more
Hold my head down again, just like before
Hold my head down again, bring back some more
Imitation now
Jenny want to ride in snow
I can will it to push down some more, some more
Light the force that's on my back and get right with you
You're lying down while getting up could get right with
you
You're calming down I'm getting hard, could get right
with you
Light the force that's on my back and get right with you
Hold my head down again, bring back some more
Hold my head down again, just like before
Hold my head down again, bring back some more
It's so obvious
You're just a temptress
Swap neurosis-es
But we're running out of time
We're running out of time
We're running out of time
To keep myself in line
Millions of creatures could open my eyes
So hold my head down again, please
Oh, hold my head down again, bring back some more
Hold my head down again, just like before
Hold my head down again, bring back some more
