(Jim Weatherly/John David)

I can't shake this crazy feeling
When we're close I still get all stirred up
I've been around and I know by now
This can't be anything but love

And I recall the first time I saw you
How you looked at me with those blue eyes
I thought you'd be just another passing thing
Boy, was I wrong
'Cause nothing's ever felt so right

And I can't shake this crazy feeling
When we're close I still get all stirred up
I've been around and I know by now
This can't be anything but love

All those times when I fell hard for others
Falling's as far as I got
It always seemed to burn out and lose it's glow
But I've finally got one now
That's still burning hot

And I can't shake this crazy feeling
When we're close I still get all stirred up
I've been around and I know by now
This can't be anything but love

This can't be anything but love
