"Watch Out For The Other Guy"

You leave her alone every evening
You're late coming home every night
She's gotten tired of believing
And telling herself it's all right

You wouldn't know she's got somewhere to go
Somebody who'll treat her right
You've gotta watch out for the other guy

Chorus:

He'll drive you right out of her mind
He'll come up and hit you right from behind
You've gotta watch out for the other guy

You think that she's yours for the taking
You think that she'll always be there
She's got a heart for the breaking
She thinks that you just don't care

So go on and go..leave her alone
Don't take your eyes off of her
You've gotta watch out for the other guy

repeat chorus twice:
