I like the way you pull your hair past your ear
I love my necklace around your wrist
I like your smooth white skin design

You're my only drug, girl
Take too much and you'll die in love
Already made up my mind, girl
You're the satellite of my sky
You watch every move of mine

I swear I'll get out to Dallas
Will be far
I swear I'll get out to Dallas
All in time

I move my hands down your spine
Stay in this moment for the rest of your life
I knew my eyes would dream while we're still awake

You're my only drug, girl
Take too much and you'll die in love
Already made up my mind, girl
You're the satellite of my sky
You watch every move of mine

I swear I'll get out to Dallas
Will be far
I swear I'll get out to Dallas
All in time
