He holds her up like a trophy
Is this real like we should be
And all your time is spent with his lies

You picked your guess
Does it have to be like this
Remember what it's like to be alive?

Run away with me like your favorite movie
Let's make a different ending to this story
Let's find out who we are

Close your eyes
I'll take the wheel let's just drive
Looked through the rear view as the city's getting
smaller
Heading south for a new sunrise
Look out the window as your hair blows on forever
And as I whisper

Run away with me like your favorite movie
Let's make a different ending to this story
Run away with me like your favorite movie
Let's make a different ending to this story
Let's find out who we are

We drive the car down the coastline
All alone by the beach in the rain
Could you live in this moment for the rest of your life?
In this moment?

Run away with me like your favorite movie
Let's make a different ending to this story
Run away with me like your favorite movie
Let's make a different ending to this story
Let's find out who we are
Let's find out who we are
