Stop, Stare, Goodbye.
This guitar won't play the sound but it's all right
Don't stop, stare, go by, go by, go by

And it was you that flew the ocean
And it was you that makes the sky
And it was you I should have stopped to understand
Why

And she's got dances, you know
And we had dances, she knows
If you fallen into deep, look back

Break too fast in a car that's holding everything I have
They stopped, stared, drove by, goodbye, goodbye

And it was you that flew the ocean
And it was you that makes the sky
And it was you I should have stopped to understand
Why

And she's got dances, you know
And we had dances, she knows
If you fallen into deep, look back

And we crashed, and we crashed
And we crashed, and we crashed
And we crashed, and we crashed
And we crashed, and we crashed
