Stars fade blue
If only I had one more chance with you
Stars fade blue
If only I had one more chance with you

Stars fade blue
If only I had one more chance with you
I'm a time bomb ready to explode
She's the virus in my lungs

Tell me what do you think about the girl?
Tell me what do you think about the girl?
About the girl

Stars fade blue
If only I had one more chance with you
I'm a time bomb ready to explode
She's the virus in my lungs

Tell me what do you think about the girl?
Tell me what do you think about the girl?
Tell me what do you think about the girl?
Tell me what do you think about the girl?
'Cause in my eyes she's perfect
In my eyes she's perfect
In my eyes she's perfect

Stars fade blue
If only I had one more chance with you
