Looking for starlight
The lady made it alright
She was the lady
And I knew right from the start
Sweet lady starlight
Come on and make it tonight
You turn it on so easy
And the lady is my lady starlight

Sing the song that should be sung
And your love can be the voice
The tears in my eyes
I'm crying tears of joy
When you say I'm your boy

Time - slips right on away
But why should care
What people say
I will watch over lady starlight
Looking for starlight

Looking for starlight
The lady made it alright
She was the lady
And I knew right from the start
Sweet lady starlight
Come on and make it tonight
You turn it on so easy
And the lady is my lady starlight

Dance she dances the valley
And Rudi is the king
I laugh when she's happy
The powers in my hands
And I must be a man
