Time heals all, time makes it clean

Lord knows you were dirty
They said you had germs
Washed by their mothers they played games
They left you alone
And it was said aloud
She's not one of us, she's insane

Time heals all, times makes it clear

Last one in the water
Last one to the fence
It's a race that's run every day
Who could ever guess
Who would ever know
That the cootie girl could cause such pain

Ah they were cruel, but look what's happened to you
You're better than the best, you're cooler than the rest
Well it's not funny but who's laughing now?

Who's laughing now?

Well guess who's laughing now?

Who's laughing now?
