

Rory Gallagher "There's A Light"

Visit "[There's A Light](#)" on MotoLyrics.com

There's a light that shines on me
Ever since you came to me
It won't go, it won't go away
Now I know that you're gonna stay

Now that I know your love
Means so much more to me now

Come here now baby
Now look what you've done to me now
I don't pray for what could have been
I feel I'm flying naturally

I can fly but I won't go away
In your sky that's where I wanna stay

Come here now baby
Now look what you've done to me now
If I don't show, would you know
Where to look for me now?

I do not stare absently
Counting waves up on the sea
Now I know where I wanna stay
There ain't no hard decisions to make

Come here now baby
Now look what you've done to me now
If I don't show, would you know
Who to send for me now?

There's a light
There's a light
There's a light
